HIGHLIGHTS California's seasonally adjusted unemployment rate for July was 7.6 percent, down from the 8.2 percent in June. A year ago, in July, the rate was 5.3 percent. During July in California, seasonally adjusted employment increased by 64,000 over the month while unemployment decreased by 92,000. The number of job losers decreased from 582,800 in June to 582,300 in July. The number of job leavers increased by 33,000 during the month. The national civilian seasonally adjusted unemployment rate for July was 6.8 percent, down from the 7.0 percent in June.

Total nonagricultural wage and salary employment, not seasonally adjusted, decreased by 99,400 from 12,882,300 in June to 12,782,900 in July. The largest decrease in employment was in the local education component of the government sector with a loss of 108,900, although this was less than seasonally expected. Other major sectors that registered decreases were construction with 400 fewer jobs and durable goods manufacturing with 7,300 fewer jobs. The largest increases in employment were in nondurable goods manufacturing with 6,600 additional jobs and the service sector with 4,800 additional jobs. Additional employment increases were posted in transportation and public utilities with 3,300; finance, insurance, and real estate with 1,100; and trade with 1,400. After adjusting the data for seasonal variation, increases were recorded in all major sectors except goods-producing industries; mining, construction, and manufacturing. The decrease in the manufacturing sector was spread throughout most components in durable goods and the food and kindred sector in nondurable goods. Since July 1990, total nonagricultural wage and salary employment, not seasonally adjusted, has decreased by 85,800, a 0.7 percent drop over the year. During June, average weekly earnings and average weekly hours worked in manufacturing increased to $485 and 40.8 respectively.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.
